

Jerin Sebastian

Android Developer

A certified android developer with expertise in professional **Android** application development. Experience in building end to end applications, libraries and SDKs involving cloud services like **Firebase**, **GCP** and **AWS**. Developer of **3 android apps** (personal) published in Google play store, author of **4 Open-Source libraries** for android and **1 Cloud SDK**. A successful freelancer with **30+ completed projects** and experience in designing and building applications for startups. Author of several **articles** and **tutorials** on **Medium** and **TheDroidHub**. Seeking opportunities to utilize my proven skill in android development and gain unparalleled experience on the way.

PERSONAL PROJECTS

Helping Hands Android App (05/2021)

- Developed an **Open-Source Android application** for finding nearby oxygen and medical supplier. This app requires **No Login/Signup** and uses **Geo-location** to find the nearest supplier.

JS Cloud SDK (04/2021)

- This is a complete **Open-Source SDK** developed as an alternative to **Firebase**. This project implements TCP communication and includes extended features like **User-Management**, **Cloud messaging**, **Realtime Database**, **Chat Engine**, etc.

Find Me Android App (10/2020)

- Developed an **Android application** which **tracks the location** of family members in case of emergency. This app uses **GPS** to find exact location and uses **Firebase** as backend.
